

# Science in our

*At Broom Leys we use science to gain our own knowledge of the world and we find out how it affects our lives. We question, answer, explore and investigate for ourselves, as well as learning from the scientists who came before us.*

# W O R L D

*Why? We ask our own questions about what we do and find the answers ourselves.*

*Ourselves. Our science is our own. We work together and have fun when we do it.*

*Real-life. We see how science affects our own lives.*

*Language. We talk about science using scientific vocabulary and language.*

*Do it! We explore our own science investigations practically, and love to get our hands dirty!*
